CCP GLOBAL PQD NEWSFLASH 2024 Q2

OVERVIEW

The CCP Global PQD Newsflash provides an overview of the risk management provided by CCPs across the globe and complements public statistics such as the BIS derivatives statistics. This PQD Newsflash offers an overview of the key statistics, scale and nature of financial market infrastructure risk management from a global perspective and allows market participants to gain a clearer view of the CCP ecosystem.

The data is aggregated directly from the CCPs themselves according to the CCP Global standardized template, carrying information stipulated in global regulatory guidance. Further details for individual CCPs can be found in links provided on the [CCP Global website](#).

Data for 60 CCPs (38 CCP Global members) are included*:

Americas	17
APAC	24
EMEA	19

- This publication underlines the scope and scale of risk mitigation provided by central clearing
- CCPs exposure to credit risk is collateralized through high-quality and liquid collateral;
- CCPs risk-manage their actual clearing exposure by collecting *mark-to-market* losses through regular variation margin (or similar) payments, and their potential future exposure by collecting initial margin.

PQD UPDATES FOR 2024 Q1

- CCP Global released an interim update to the [PQD FAQ Guide](#) which includes a PQD retention policy and a PQD inquiry policy. CCPs should ensure that their publicly available PQDs are accessible on their websites for a minimum of 5-years, once published. Internally, CCPs should retain PQDs in accordance with their applicable retention policy.
- As practices and standards change and due to evolving CCP methodologies, CCPs would be available to provide responses to PQD questions only within the last 3-years of PQD publications.

The following CCP Global PQD Newsflash provides a snapshot of the PQD data. However, for an in-depth analysis, we invite readers to view our PQD Quarterly Trends Report (QTR):

2024 Q2 CCP Global PQD Quarterly Trends Report (QTR) Available online, [here](#).

The CCP Global QTR provides a detailed insight into the global CCP PQD landscape through various charts and analyses. The report offers market participants a view of the distribution of collateral across the Americas, APAC and EMEA. In addition, the report distils key summaries and trends captured from the PQD data through a variety of selected disclosures.

*Euronext Clearing (CC&G), IRGIT & NCC PQD figures are incorporated as non-CCP Global members. NCC - 2024Q1 PQD figures were used in this report since these PQDs were not available as of date.

†Data has been normalized to USD equivalent, based on a conversion from quarter-end FX rates provided by the [ECB](#). CCPG undertakes periodic improvements to the data quality of the PQD aggregation for the NF on a quarterly basis and thus changes to previous figures may incur as a result of enhancing data accuracy and reliability of how the data is calculated on an aggregate basis.

**Total OC = $(IM_{Held} + DF_{Held}) - (IM_{Required} + DF_{Required})$ = Disclosures (6.2.15 + 4.3.15) - (6.1.1 + 4.1.4). Only PostHaircut values are used for Held values. Figures have been rounded to the nearest whole number, therefore, there may be a slight difference in the Total Overcollateralization figure in the region of ±USD 1 billion.

‡The sum of the % in the IM column ≠ 100% since: The sum of IM Held across 6.2.1 – 6.2.14 is lower than the Total IM Held Values for 6.2.15, due to certain PQDs not providing a breakdown of the IM held across these data points. This is also due to the following: 1). DTCC have requested that 6.2.15 figures be equivalent to 4.3.15 figures, therefore no breakdown for 6.2.1 – 6.2.14 is provided, and 2). OCC 6.2.15 total > sum of 6.2.1 – 6.2.14. As of 2023 Q3, all OCC "PreHaircut" figures for Client/House IM are considered "PostHaircut", thus a clearer view of the proportions of IM held for 6.2.1 – 6.2.14 can be observed. Four other CCPs only provide totals for their 6.2.15 values.
